

Jackson's Greenhouse

Bulk Seed Catalog

Beans, Bush

Blue Lake 274

50-60 days

Heirloom variety with great flavor and productivity. 5-6" long pods that will set throughout the plant.

Resistant to bean mosaic virus.

Burpee's Stringless

50 days

Heirloom, a classic stringless bean of exceptional flavor. Slightly curved, round pods are about 6" long. Plants are entirely self-supporting.

Commodore

60 days

Plants stay compact at 16 inches tall and produce vigorous, dark green, 6-8" long pods. Stringless while young and tender.

Disease resistant.

Contender

50 days

Stringless, bush bean that matures early. Bean pods grow up to 8" long but are best eaten early when they are 5" long.

Jade ★

55 days

A favorite among our customers! Upright, bushy plants hold the pods high, avoiding tip rot. More heat and cold tolerant than other types.

Resistant to common mosaic viruses 1 and NY15, and tolerant to curly top virus and rust.

Beans, Bush (continued)

Kentucky Wonder

50 days

Old time favorite with reliability, great flavor, large yields and tender pods. 16" tall plants.

Roma II Italian Flat Pod

54 days

A bush version of the popular Italian pole bean.

Pods are 5-6" long, thick, flat, medium green and stringless. Very productive 18" plants.

Top Crop

50 days

Old time favorite! Compact growth habit and early yield. Stringless and fiberless.

Resistant to bean mosaic virus.

Beans, Pole

Blue Lake FM-1K ★ 50-60 days

Heirloom, vigorous production of 6" long tender stringless beans. The beans will set from the base of the plant all the way to the top of the 6' tall plants.

Disease resistant.

Kentucky Wonder 50-60 days

Heirloom, old time favorite with reliability, great flavor, large yields and tender pods. 7' tall vines.

Rattlesnake 65 days

Heirloom, green pods with purple streaks. Good flavor and very tender. The speckled seeds are popular in soup.

Beans, other

Cowpea Pinkeye Purple Hull 60-70 days

Compact, 2'-tall plants that don't need to be staked, and produce prolifically in drier conditions than other beans. Used in traditional Southern dishes.

Cowpea California Blackeye ★ 70 days

An old standard variety with vigorous, high-yielding vines. Used in traditional Southern dishes.

Great Northern Bean 83-90 days

Characterized by their light flavor profile and their size. Great Northern beans are commonly used in soups and stews.

Lima Bean Christmas Speckled

50-60 days

Heirloom, high yield under hot, humid conditions.

Seeds are about the size of a quarter, 5-6 in. long pods. Use fresh or dry.

Lima Bean Fordhook 242 ★ 65 days

Ever-popular variety produces massive yields of light-green 4" pods, each packed with 3-5 large beans. Crisply flavorful, easy-shelling beans are excellent for freezing. Drought- and heat-tolerant.

Beans, other (continued)

Pinto Bean

95 days

18-24" tall vigorous bush produces 3-4"L flat, green pods with light tan/brown speckled beans. Can be used as snap beans when young and tender or used as a dry bean.

Red Kidney Bean

95 days

2-3' tall plants that are a great producer. Great for dry beans. Good for use in soup.

Beets

Cylindra

54 days

Good tasting and easy to cut into uniform slices for cooking or canning with little waste. Avg. 5" long x 2" diameter. **Tolerance to scab and Cercospora.**

Detroit Dark Red

60 days

Heirloom, our customers' favorite beets! Tender and delicious, these 2½"-3" beautiful, deep crimson beets do not get woody as do smaller varieties if allowed to grow large. Great for canning or pickling.

Ruby Queen

52 days

Early, round and smooth-skinned beets. An early maturing variety, it performs in poor soils and holds its shape when crowded. May also be used for microgreens.

Sugar Beet

90-100 days

Can be used to make your own sugar! Very large white beets that are easy to grow. Excellent for producing sugar, use as microgreens, wildlife food plots or as a cover crop.

Cabbage

All Seasons

87 days

Quick-to-mature cabbage heads are 6"-8" in diameter and 3-4 pounds, tightly wrapped, and perfect for small gardens. Resists splitting and stores up to 6 months.

Copenhagen Market ★

60-100 days

Very heat resistant cabbage that is resistant to yellowing and heads that are about 10-11" across and average about 11-14 pounds.

Early Round Dutch

70 days

Produces 4 to 5 pound heads with good wrapper leaves. Nice and early, slow to bolt, and full of great flavor!

Golden Acre ★

65 days

Dense, solid heads reach 5-7 inches in diameter and weights of 3-5 pounds. Plants are very compact allowing closer spacing than some varieties.

Late Flat Dutch

100 days

Good keeper and the standard late season variety. Heads form up to 12 inches and can weigh 15 pounds.

Cabbage, continued

Red Acre

75 days

Each cabbage head grows to 7 inches in diameter and weighs about 3 pounds. Resistant to cabbage yellowing and is great for gardens that have little space. **Disease resistant.**

Carrots

Danvers Half Long

65-75 days

Heirloom, old standard American carrot, adaptable and dependable. A blunt, tapered, thick variety with 7-inch roots, it is nearly coreless.

Little Finger

55 days

The most popular variety of baby carrots. Tender, sweet miniature carrots are ideal for eating fresh, canning or pickling.

Scarlet Nantes ★

65-75 days

Heirloom, Sweet flavor, tender, abundant producer, and consistent quality. Nearly coreless.

Tendersweet

65 days

9 to 10 inches long. This is known as the sweetest carrot there is. It is a deep color with a great flavor for eating, cooking, or canning.

Clover

Dutch White

Perennial clover that can be used as a cover crop, groundcover and erosion control.

Popular for lawn mixtures.

Collards

Georgia Southern

75 days

Heirloom, produces bluish-green leaves that can grow up to 36" tall and do not bunch or head like cabbage leaves. Great for cooking or freezing.

Vates★

75 days

Heirloom, produces dark green leaves that are very delicious. Grows to a height of 30" and is very slow to bolt. High yielding.

Corn, Sweet

Ambrosia

75 days

Large 8.5" 16 row ears on compact 6' plants. Great for canning, freezing, and fresh eating. Bi-color.

Bodacious

75 days

Exceptionally tender, flavorful sweet 8" long ears of corn and good disease resistance. Excellent for eating fresh, canning and freezing. Yellow.

Incredible

75 days

Produces large, 9.5" ears that have an attractive husk for market stands or fresh delivery. Exceptional flavor with solid disease resistance. Yellow.

Jackpot

82 days

Maintains it's sweetness up to several days after harvest. Mid-to late-season variety with resistance to common rust. 6 ft. tall plants bear 8 in. long ears.

Kandy Korn

81 days

Tender, juicy, golden yellow 8 inch ears are packed full of good flavor.

Corn, Sweet

Peaches & Cream

83 days

8–10" long ears of corn with bi-color kernels

bursting with sweetness. Great for fresh eating and canning.

Serendipity

82 days

Stalks average 8 feet tall, ear length 8 inches long, 16-18 rows of kernels, 1 3/4 inches in diameter.

Silver Queen

92 days

8-foot stalks yield a great bounty of 8- to 9-inch ears. High yielding and great for fresh eating.

Temptation

70 days

Very heavy-yielding with plenty of 7- to 8-inch long ears. Great for fresh eating, canning or freezing.

Crown Vetch

50 days

An extremely fast and aggressive plant, crown vetch produces a quick ground cover for erosion control with white to pink flowers.

Cucumbers

Armenian

60-70 days

Heirloom, light green, ribbed, mild tasting cucumber. Fruit reaches over 24" long but is best harvested at 15".

Best Slice

57 days

10" long burpless cucumber. Great dwarf variety that does well in containers.

Boston Pickling ★

50-60 days

Heirloom, 3-7" long thin skinned cucumbers. Great for pickling.

Marketmore 76

58 days

8-9" long cucumbers that are vigorous and nutritious.

Resistant to scab, powdery mildew, and cucumber mosaic disease.

National Pickling

55 days

Heirloom, crisp and tasty cucumbers great for pickling.

Cucumbers, continued

Spacemaster

60 days

7.5-8" long cucumbers with compact growth habit suited for containers.

Straight Eight Elite

64 days

8" long burpless cucumber.

Resistant to cucumber mosaic virus, powdery mildew, downy mildew, and scab.

Sweet Success

54 days

14" long burpless, virtually seedless cucumbers.

Great slicer.

Resistant to cucumber mosaic virus, scab, and target leaf spot.

Tasty Green

60 days

10-12" long thin skinned, crunchy Japanese cucumbers. Great slicer.

Resistant to powdery mildew and downy mildew.

Tendergreen

65 days

Heirloom with 6-8" long burpless cucumbers.

Great for pickling or fresh eating.

Cucumbers, continued

Bush Pickle

45 days

Hybrid compact, space-saving variety of pickling cucumber ideal for small gardens and container planting, 2'-3' wide, 4"-5" fruits. **Resistant to powdery mildew and cucumber mosaic virus.**

Flowers

Baby's Breath "Covent Garden"

Highly popular heirloom annual. Great for floral arrangements. 18"-24" tall and 12"-18" wide.

Drought-tolerant and prefers full sun.

Bachelor's Button

Small 1.5"-3" blue blooms that appear in late spring to early summer. Great annual pollinator attractor.

Four O' Clocks "Choice Mix"

Perennial flower that blooms in late afternoon (earning its name) that attracts many pollinators. 12"-36" at maturity. Plant in full sun and is drought tolerant.
